POLICY STATEMENT OF SUPERINTENDENT

School authorities have both a moral obligation and a legal responsibility to provide for protection of public property and the life, health, and property of students, faculty and staff in emergencies. These obligations must be met with safety, security and care at all times.

This comprehensive plan has been developed for you to use as is, or you and your staff may choose to make modifications. Every public elementary, junior, and high school must have such plan in operation. Modifications should be reported to my office.

Plans will include an organization chart with clear lines of succession and emergency assignments designated. Consideration must also be given to security and preservation of essential records and sensitive areas such as boiler room and electrical panels.

Kay J. Easley
Superintendent

POLICY STATEMENT OF SUPERINTENDENT/PRINCIPAL
POLICY STATEMENT OF PRINCIPAL

Each school will have an Emergency Procedures Plan designed to minimize injury and the loss of life and to protect property.

The principal serves as the planning coordinator and will assign tasks to staff to accomplish the objectives of the Emergency Procedures Plan.

Assignment of duties to specific individuals does not relieve other school employees from acting in their areas of responsibility in emergencies.

Once a year, within a month after school commences, the principal will arrange for a faculty meeting for the purpose of reviewing the validity of the plan and to update the staff regarding new procedures.

A chain of command (person in charge) that will include names and phone numbers of the persons to succeed the principal in the event of his/her absence or incapacitation will be designated in writing and prominently displayed in the school office.

The principal will send reports and documentation of emergency incidents covered in this guide to the Supervisor of Child Welfare and Attendance.
Incidents occur on school campuses that involve emergency response agencies (Police, Fire, EMS, etc.). When these agencies respond to a call from the school, that agency will assume control and command of the incident. That incident may or may not impact the entire school. The scope of the control and command will be determined by the incident. Regardless of the size of the incident, the principal or designee will play a vital role in the reporting and handling of the incident.

**Response to Any Emergency**

- Assess situation, verify information, and notify 932-5753 (if necessary). Notify the principal, who will notify the Superintendent (932-4081 ext. 23).
- Notify CPR/first aid certified persons in school building of medical emergencies, if necessary.
  Names of CPR/first aid certified persons are listed in Crisis Team Members section.
- Assemble Crisis Team and seal off high-risk area.
- Take charge of area until incident is contained or relieved by ____________.
- Shelter in place or evacuate the building. Nature of incident may require alternative evacuation site.
- Designate a control area and maintain a phone log of all calls made and received and a timed sequence of events.
- Crisis team runners deliver any additional instructions from control center to classrooms and also collect status information.
- Refer media to Superintendent (318) 932-4081 ext. 23 Work (__________) Home.

**EMERGENCY MANAGEMENT STATEMENT/CHECKLIST FOR PRINCIPAL**

9. Secretaries will secure all records and office valuables in a safe place.

WEAPONS

A weapon is any instrument of offensive or defensive combat, or anything used, or designed to be used, in destroying, defeating or injuring a person. In Louisiana, a dangerous weapon includes any gas, liquid, or other substance or instrumentality, which, in the manner used, is calculated to or likely to produce death or great bodily harm. Weapons include, but are not limited to, any size knife, firearm, air gun, sword, spear, ax, club, explosive device, fireworks, or other incendiary device, instrument of the martial arts, firearms ammunition, knuckles, blackjack, night stick, mace, chains, razor, box cutter, ice pick, screwdriver, homemade weapon, or any other device which may produce bodily harm or death.

All students and staff of RRPSB shall not be in possession of any weapon while on school property or at school functions (including personal vehicles).

Staff or student who is aware of a weapon brought to school:

Student

- Send reporting student to the office, if possible.
- If the reporting is unable/unwilling to report, follow steps below. The student may remain anonymous.
- Notify principal.

Teacher

Vandalism

Vandalism generally is the willful and malicious destruction of property. The destruction must have been intentional or in such reckless and wanton disregard of the rights of others to be the equivalent of intent. Malice may be inferred from the act of destruction. Louisiana also defines vandalism in the criminal laws of criminal mischief, criminal damage to property and institutional vandalism.

**Vandalism Procedures:**

- Assess damage and take photos if necessary.
- Notify Superintendent and law enforcement (318) 932-5753.
- Resolve the damage at campus level or notify maintenance for assistance.
- Complete all documentation forms.
TERRORISM

This is for the “least exposed,” not in imminent danger and a facility that is not under attack, nor has been penetrated by dangerous individuals.

The First Day: All School Levels

> Immediately contain the environment. Monitor entry/exit points.

> Do not close school unless evacuated by Police, FEMS, FBI. Schools are safer than many environments.

> Mobilize available Crisis Team Members. Facilitate ongoing, incoming-outgoing communication and/or actions and instructions.

> If a terrorist incident happens during school hours, communicate what has happened to staff via e-mail or Crisis Team and reassure that students and staff “are all currently safe and if new issues develop you will inform them quickly.”

> Mobilize Crisis Team to insure all staff are following protocol.

> Provide secretaries with a script for answering the phone with the intent of calming parents and reassuring them of their child’s safety.

> Assign staff at major entry points to greet parents and escort them to a designated waiting area, also staffed, while they wait for you to bring their child to them. (Having parents in the halls or going into classrooms only adds to chaos, increases student anxiety, and can create additional risk factors.) Have parental release slips available.

> Ask for Police presence outside the entrance areas, if necessary. (The visibility of law enforcement can be very calming for adults and children. In some cases police might be asked to escort buses to help children feel safe.)

> Immediately direct staff to assume their triage duties (responsibilities for maintaining safety for specific areas — halls, entry/exit points, etc. and communicating information about areas to the command post, providing first aid, etc.)

> Send a letter home to parents reiterating the schools preparedness and safety.

> Cancel after school events. (Take your lead, if possible, from statewide or nationwide responses.)

> Be prepared (sing script) to ask for responsible behavior, especially in a diverse community.

> Be prepared to speak to health hazards: bio-terrorism, Anthrax, etc. (Use Bioterrorism information)

> Send information of such to parents and/or have available on website, etc. for parent access.

> Provide staff that receive suspicious packages with guidelines for managing the delivery and inspection of packages.

> Present all staff with a letter from the Superintendent’s office articulating expectations of them and comments about sensitive issues.

> Operational Debriefing for outlining feelings, responsibilities, etc.

TERRORISM/BIO-CHEMICAL HAZARD
**BIO-CHEMICAL HAZARDS**

**Anthrax**
*Acquisition:* Difficult to obtain lethal bacteria stock. Non-lethal stock is much more prevalent.
*Transmission:* Introduction of the spore through the respiratory tract, skin contact, or consumption of contaminated food.
*Symptoms:* Usually develop within 7 days of exposure
— *inhalation:* fever body aches, tiredness, cough, chest discomfort, sweating, shortness of breath, difficulty breathing, blueness around nailbeds or lips, shock — *cutaneous:* local edema (sores) occur resulting circular ulcer/sore followed by possible discharge of fluid; sores may turn black after a few days — *intestinal:* inflammation of the intestinal tract, nausea, loss of appetite, vomiting and fever followed by abdominal pain, vomiting blood and diarrhea.
*Treatment:* Vaccine exists. Treatable with antibiotics, but nearly always fatal if inhaled, thereafter when flu-like symptoms develop.
*Observations:* Likely terrorist agent because it can be stored, is resistant to weather conditions and not activated until inhaled, absorbed or ingested.

**Botulism**
*Acquisition:* Widely available, but most poisonous forms of this toxin are rare and difficult to use as a weapon.
*Lethality:* High.
*Exposure:* Eating contaminated food, infected wounds or aerosolized form — it cannot be passed person to person.
*Symptoms:* Blurred vision, drooping eyelids, slurred speech, difficulty swallowing, dry mouth, muscle weakness that descends from the shoulders down the body, possible paralysis of the arms, legs, trunk and respiratory muscles.
*Treatment:* Vaccine being tested. U.S. Centers for Disease Control and Prevention maintains a supply of effective antitoxin.
*Observations:* Stable for weeks in food or still water, but it is difficult to use as a weapon and is not considered likely for use in mass attacks.

**Plague**
*Acquisition:* Very difficult to obtain lethal bacterial stock.
*Lethality:* Very high. Very contagious
*Exposure:* From wild rodent with infected fleas or inhaling bacteria — can be passed person to person.
*Symptoms:* Fever, cough, shortness of breath, chest pain, spitting up blood, shock.
*Treatment:* No vaccine, rapid use of antibiotics can be effective.
*Observations:* Not considered a likely agent used by terrorists because heat and sun render it harmless and it is difficult to turn into a weapon.

**Ebola**
*Acquisition:* Very difficult to obtain, unsafe to process.
*Lethality:* Very high.
*Treatment:* Vaccine. Some antiviral drugs may work, but overall effectiveness of treatments is questionable. Up to 90% of victims die.
*Observations:* Not considered a likely agent used by terrorists because it is poorly understood and difficult to acquire.

**Smallpox**
*Acquisition:* Only confirmed sources of this disease, which killed more than 500 million people in the twentieth century, are in one U.S. and one Russian lab. But circumstantial evidence suggests it is available elsewhere.
*Lethality:* High.
*Exposure:* Spread through the air or by contact with fluid from smallpox skin blisters — can be passed person to person.
*Symptoms:* Flu like symptoms, high fever for 2 to 4 days, body aches and pains, fatigue, vomiting, cluster-like skin lesions in the mouth, on the lips and fact progressing to the rest of the body.
*Treatment:* Vaccine exists in limited supplies. There is no cure and generally no effective treatments after infection.
*Observations:* If terrorist could obtain this virus, one infected person on an airplane could infect most passengers and possibly cause a national epidemic.
Every building needs to establish and on-site primary and alternate location, as well as an off-site location for evacuation and for the emergency Command Post. The Command Post and the Medical Triage area should have immediate access to phone communications and other forms of communication (i.e. fax machine, computers, intercom, building bell controls, etc.).

Seizure

Signs and Symptoms
- Uncontrolled muscle contractions caused by possible head injury, drug overdose, epilepsy, fever, acute infection

MEDIA PROCEDURES

Mass media is the most efficient means for disseminating information about events or situations within the school district or on a particular Red River Parish school campus.

All information about an incident, accident, or crisis must be reported immediately to the Superintendent or his/her designee. Complete information will then be released to the media and the general public through the Superintendent’s office.

All requests for information by the media will be handled via this procedure. All teachers, students, and the other school personnel should avoid being interviewed or providing information to the media and should instead direct such inquiries to the Superintendent or the Superintendent’s designee.

An incident, accident, or crisis on a Red River Parish school campus or property constitutes news, and news organizations are anticipated to travel to the scene to gather facts.

Only the Superintendent or appropriate designees should provide information to newspaper, radio, or television representatives. Isolated quotes from teachers, students, or other personnel may be incomplete or misleading, and therefore, should be avoided.

If you are contacted by a media representative, either in person, or by telephone, refer the caller to the Superintendent’s office. Every effort will be made to handle the request for information efficiently, promptly, and thoroughly.

Respect privacy of victim(s) and family of victim(s). Do not release names to media.

Refrain from exaggerating or sensationalizing accidents, incidents, or crisis.

All staff must refer media to Superintendent.

Red River Parish School System assumes responsibility for issuing statements during an emergency.

- Superintendent serves as parish spokesperson unless he/she designates a spokesperson.
  If spokesperson is unavailable, an alternate assumes responsibilities.
